ABSTRACT

Undergraduate and graduate student costs for fall 1984 at public colleges are reported, including institutional comparative data. The information is based on charges at 364 publicly-supported institutions that are members of the American Association of State Colleges and Universities (AASCU). In the fall 1984, total undergraduate resident charges at AASCU increased at a rate of 6 percent, 2 percentage points below the previous year's increase. The costs of higher education have been increasing at a higher rate than the typical consumer costs for goods and services. The lowest average charges for undergraduate residents and nonresidents continued in the southwest United States, and Guam, Puerto Rico, and the Virgin Islands. Information is presented on: a 2-year comparison of average undergraduate charges for state resident and nonresidents students; average graduate resident and nonresident charges for 2 years; the distribution of increases among the states for undergraduate resident and nonresident tuition and fees; state undergraduate and graduate average charges organized by regions; and 1983 and 1984 undergraduate and graduate charges for tuition and fees by school for resident and nonresident students, and combined room and board charges. PREFACE

In the past year, governors and state legislatures have moved to increase funding for public colleges and universities, stemming from a concern for the quality of the educational experience. In some states, compromises have been made to keep tuition and fee increases low with the promise of raising appropriations just enough to avoid cutbacks in essential services and allow increases in faculty and staff salaries.

This effort is reflected in the low student charges at the 364 publicly-supported institutions that are members of the American Association of State Colleges and Universities (AASCU). For the third year in a row, their rate of increase for tuition and fees is lower than other institutions in the public sector.

In the Fall of 1984, total undergraduate resident charges at AASCU institutions increased at a rate of 6 percent, 2 percentage points below last year's increase. The significant change occurred in undergraduate resident tuition and fees, where the rate of increase of 7 percent is 3 percentage points below last year's rate. Nonresident tuition and fees increased at a rate of 9 percent, 1 percentage point below last year's rate. The room and board rate of increase, 6 percent, was also 1 percentage point below last year's rate.

The 1984 AASCU report on student charges compares average data on institutions reporting charges for two consecutive years. It includes a complete list of respondents and reported charges as appendixes.

At a time when parents expect and want their children to attend public institutions of higher education in their home state, the report shows that AASCU institutions are doing their part to ensure that quality programs are affordable for those wishing to participate in higher education.

Allan W. Ostar
President

FINDINGS

Overall Undergraduate Charges

As predicted by the reports from the American Council on Education and the Scholarship Service of the College Board, the rate of increase for student tuition and fees at member institutions of the American Association of State Colleges and Universities (AASCU) has declined again this year. Overall rates also decreased, by two percentage points.

A two-year comparison of average undergraduate charges for state resident and nonresident students at AASCU members appears in Table I.

TABLE I

AVERAGE UNDERGRADUATE CHARGES
Fall 1983 and Fall 1984

	Tuition and Fees		Room and Board	Total Charges *	
	Resident	Nonresident		Resident	Nonresident
Fall 1983 **	1030	2462	2060	3090	4522
Fall 1984	1106	2674	2184	3290	4858
Dollar Increase	76	212	124	200	336
Percent Increase	7	9	6	6	7
Last Reported Increase, 1983	10	10	7	8	9

* The category "Total Charges" represents the average cost of tuition and required fees, combined with the average room and board charge. Books, transportation, and personal expenses are not included. The room and board average is based on those institutions offering both. Of the survey respondents, 47 do not offer room and board and 13 offer room only.

** The fall 1983 figures used to compute the dollar and percent change may be slightly different from those reported in 1983. This is because averages are computed on those AASCU members reporting for two consecutive years and the data base changes slightly from year to year. In 1984, there were nearly 100 more institutions responding to the survey than in 1983.

Although undergraduate charges are continuing to rise, they are doing so at a much lower rate. This is indicative of the competing concerns in the higher education arena and changes in the nation's economy.

On the one hand, the public, higher education, and state legislatures want to support quality programs, services, and faculty and staff and they want access to be affordable. On the other hand, state officials want students to shoulder a greater portion of their education costs and are searching for a way to balance the percentage contributed by the students and the public.

Compromises have been made to achieve these competing goals. Legislatures and governors have supported an increased appropriation of state funds to a level that would permit tuition and fees to be raised at a lower rate. Economic recoveries in some regions have led to increased appropriations. According to M.M. Chambers, and an annual report of state tax support for higher education published by the National Association of State Universities and Land-Grant Colleges, state tax appropriations for higher education have increased 16 percent across the country in a two-year period, 1982-1984.

Meanwhile the costs of higher education have been increasing at a higher rate than the typical consumer costs for goods and services. The Consumer Price Index (CPI) rose 4.2 percent from September 1983 to September 1984. AASCU charges experienced a 6-7 percent increase during the same period. This is consistent with the relationship between higher education costs and typical consumer costs, as expressed by the Higher Education Price Index (HEPI). The HEPI, which measures the rate of increase in costs of goods and services purchased by colleges and universities, has been running two percentage points above the CPI and the last available figures for HEPI show that from 1982-1983 the increase was 6.3 percent.

Conventional wisdom explains the outpacing phenomenon as a short-term catching-up with higher education costs. Some of the items raising higher education expenses over the typical consumer expenses are scientific equipment, computers, and faculty salaries. Utilities and food have also increased. Over the long-term, however, AASCU charges have only slightly outpaced inflation: 117 percent to 113 percent, as is demonstrated below:

	Undergraduate		Graduate		Room and
	Resident	Nonresident	Resident	Nonresident	Board
1974-75	509	1285	560	1234	1058
1984-85	1106	2674	1032	2260	2184
Percent Change	117	108	84	83	106

Percent Change in the CPI: 113

The affordability of higher education is a major concern of parents expecting their children to attend college. Two polls this past year provide new information that parents regard public higher education as a good choice for their children and at a reasonable cost.

A Roper Organization survey of parents who expect their children to attend college found that 40 percent would like their children to attend public colleges and state universities in their own states and 49 percent expect their children to attend these institutions. Only 9 percent said they want their children to attend out-of-state public colleges and universities and 8 percent think their children will do that. Conducted for the National Institute of Independent Colleges and Universities, the Roper survey found that 62 percent of parents surveyed expected their personal savings to help pay college costs, but only 51 percent are now saving for these expenses. Parents are looking to scholarships as a source of funds and expect their children to work and apply their earnings to college costs.

In a survey of 1006 adults conducted by the Group Attitudes Corporation (1984), 79.9 percent agreed to the statement that college costs are rising so fast that college will soon be unaffordable for the average person. At the same time, the costs at public four-year institutions were considered reasonable. The public's concern is clear and will probably continue to be an important factor in future decisionmaking about college costs.

Graduate Charges

Table II displays average graduate resident and nonresident charges for two years and compares the increase of 1983 to 1984. Once again, the averages will be different than those reported last year, due to the change in the reference group.

TABLE II

AVERAGE GRADUATE CHARGES
FALL 1983 AND FALL 1984

	Resident	Nonresident
Fall 1983	946	2037
Fall 1984	1032	2260
Percent Increase	9	11
Last Reported Increase, 1983	12	11

In public higher education, the charge per credit hour for undergraduate and most graduate programs is established by the governing body of the institution, whether this is a system board or an institutional board. Some fee ranges are also established from which institutions, at their discretion, augment such required student charges as activity fees and health fees. Since in any one state, groups of institutions may be organized into different systems, there will always be a variety of tuition and fee structures. This is demonstrated by slight differences in the typical annual student charges submitted by the respondents.

Graduate charges are likely to be affected by additional factors, resulting in much greater variety across institutions and within a state. For example, the typical graduate student takes 9 or 12 credit hours a semester or quarter, compared with an undergraduate full-time student's 12 or 15. Therefore, graduate charges will be lower than undergraduate charges, even when the same credit hour rate is applied for state residents, for example.

Another factor affecting graduate charges is the institutional and program mission. For example a graduate program in a technological field may be more costly than one in the social sciences. A professional program in optometry or dentistry will be more expensive for graduate students. Some graduate programs are not covered by the state budgeting process. For these, the fee structure is more comparable to that at a private institution.

These situations exist at the AASCU institutions responding to the student charges survey, however, they are not so pervasive as to make an overall average for graduate charges unreliable. The reader should be advised about the differences, so that the variances among graduate figures in the tables and Appendix B will be understandable.

State Comparisons

Presenting average charges by state masks the variability among the institutions within that state. This report attempts to deal with this problem in two ways. First, explanations of the ways institutions may differ in their charges are given, as in the section on graduate charges. Second, a high response rate is sought to gather data on enough similar institutions such that very high or low figures will not distort the typical charges for students in any one state.

Because there was such a strong response from AASCU members in most states, the averages presented in this section and accompanying tables should be representative of the charges students can expect. The reader is again advised to look at the Appendixes for a detailed understanding of the differences in student charges at institutions within the same state.

Most states showed increases for undergraduate resident tuition and fees in the range of 5-9.9 percent. Two states had no change in resident tuition and fees: Nevada and Washington. Six states were below the 5 percent range: New York, Michigan, Arkansas, South Carolina, Oregon, and the Virgin Islands. Of the states with high rates of increase last year, 20 percent and above, nearly all came down to below 10 percent in their increases this fall. California experienced a reduction of 6 percent in its resident fees. Undergraduate

nonresident tuition and fees increased in most states from 5-15 percent. States showing no change were Michigan, Florida, Nevada, Oregon, and Washington. States showing a change of under 5 percent were Maine, Arkansas, South Carolina, West Virginia, Texas and Puerto Rico

The lowest average charges for undergraduate residents and nonresidents remain in the Outlying and Southwest areas. However, the smallest increases this year are distributed throughout the regions.

Table III shows the distribution of increases among the states for undergraduate resident and nonresident tuition and fees. Tables IV and V display state undergraduate and graduate average charges organized by regions.

The pool of institutions available for computing average room and board charges is different from that available for computing the other averages. This is because institutions within the same state system may have a similar tuition and fee structure but very different options for room and board, including nore at all. To avoid confusion, therefore, this year's report does not combine average room and board charges with average tuition and fee charges by state.

AASCU is interested in reader response to this report. If you have suggestions for the enhancement of the survey or the report, contact AASCU's Office of Association Research.

METHODOLOGY

Conduct of the Survey

The 1984 Survey of Student Charges was mailed to all AASCU members and to those AASCU-type institutions that participated in last year's Early Fall Enrollment Survey. The survey went out in early September. There were 326 respondents, of these 17 are not association members. A total of 300 institutions were identified as consecutive respondents for 1983 and 1984. Only the AASCU members reporting for two consecutive years were used as the reference group for tabulating averages.

Editing of the Survey

This year the student charges survey contained the 1983 figures reported by last year's respondents. This was done to give institutions an opportunity to correct their figures and provide comparable current figures for 1984. To a great extent this technique facilitated the editing process. While there were some reporting inconsistencies due to the application of different credit hours in the computation of charges from year to year, most institutions confirmed or corrected 1983 figures.

Dicrepancies and questions were resolved by telephone conversations with the respondents. For example, an effort was made to obtain consistent academic year charges from institutions on a quarter system. Once all corrections were made, averages were computed by state and for the whole respondent group.

Student charges information will always reflect the variety of policies and people completing the survey. For example, figures may decrease slightly from year to year due to the use of a different number of credit hours, different room and board options, or different fees. Appendixes A and B should reflect the typical expenses of tuition, fees, room and board as reported by the responding institutions.

Notes on the Contents of the Appendixes

All institutions responding this year, 1984, are represented in Appendixes A and B. The student charges for 1983 (when available) and 1984 are included, as is a code for the typical room and board option for students at that institution. The combined room and board is only provided for institutions offering both, whether as a combined charge or as separate charges.

The "Room and Board Availability Code" consists of the following categories:

1. Room and board are separate fees
2. Room and board are combined fees
3. Room only available
4. Board only available
5. Room and board not offered.

Institutions responding to the survey that are not presently members of the association are identified by an asterisk in Appendix A.

** U WI Centers	836	865	3168	3168	5		

* Institutions similar in type to AASCU members, but not presently association members. These institutions have been participants in AASCU's Early Fall enrollment survey and were kind enough to respond to the association's survey of Student Charges.

** The thirteen campuses of the University of Wisconsin Centers assess the same base charges. Each individual center campus adds to that charge discretionary fees. The centers offer two-year lower division programs and are not degree-granting institutions. The centers as institutions are not AASCU members, however their chancellor is an institutional member of the association.

*** As the name indicates, West Virginia College of Graduate Studies offers only graduate programs. The charges for these are listed in Appendix B.
